

## Kako napraviti bekaup i uraditi restore u cPanel-u?

1. Ulogujte se u **cPanel** sa korisničkim imenom i šifrom koji su vam poslali.

The image shows the cPanel login interface. At the top is the cPanel logo in orange. Below it, there are two input fields: one for the username and one for the password. The username field has a person icon and the text 'Enter your username.' The password field has a lock icon and the text 'Enter your account password.' Below the password field is a blue 'Log in' button. At the bottom, there is a link for 'Reset Password'.

2. U polje za pretragu u navigaciji ukucajte **Backup** ili u okviru sekcije **Files** kliknite na opciju **Backup Wizard**.

3. Kliknite na **Back Up**.

4. Za kreiranje bekapa cPanel-a sa svim podešavanjima kliknite na **Full Backup**.

Backup Wizard

Steps:

- 1 Back Up or Restore
- 2 **Full or Partial Backup**
- 3 Download

**Full Backup**

This feature allows you to create an archive of all the files and configurations on your website.

**Full Backup** ←

Note: You can only use this option to move your account to another server or to download a copy of your account. You cannot restore Full Backups through your cPanel interface.

Go Back

**Select Partial Backup**

This feature allows you to select which partial backup you want to download.

5. U **Backup Destination** odaberite **Home Directory**, a u **Email Address** upišite email adresu na koju želite da vam stigne obaveštenje o završenom bekapu ili označite *Do not send email notification of backup completion* ukoliko ne želite da dobijete obaveštenje o završenom bekapu.

Backup Wizard

Steps:

- 1 Back Up or Restore
- 2 **Full or Partial Backup**
- 3 Download

A full backup will create an archive of all the files and configurations on your website. You can only use this to move your account to another server, or to keep a local copy of your files. You **cannot** restore full backups through your cPanel interface.

Backups Available for Download:

**Generate a Full Backup**

Backup Destination: Home Directory ← 1

Email Address: some@mail.com ← 2

Do not send email notification of backup completion. ← 3

**Generate Backup** ← 4
