

Kako kreirati i ukloniti mailing listu u cPanel-u?

1. Ulogujte se u **cPanel** sa korisničkim imenom i šifrom koji su vam poslali.

The image shows the cPanel login interface. At the top is the cPanel logo in orange. Below it are two input fields: one for 'Username' with a person icon and the placeholder text 'Enter your username.', and one for 'Password' with a lock icon and the placeholder text 'Enter your account password.'. A blue 'Log in' button is positioned below the password field. At the bottom of the form is a link for 'Reset Password'.

2. Kliknite na **Mailing Lists** u *EMAIL* sekciji.

3. Unesite sve neophodne informacije.

- **List Name** - Ime liste koju želite da kreirate (newsletter, itd.)
- **Domain** – Izaberite ime domena na osnovu koga želite da lista bude kreirana
- **Password** – Upišite lozinku za upravljanje listom ili kliknite na dugme **Password Generator** kako bi vam se automatski odredila šifra
- **Password (confirm)** - Potvrdite lozinku
- **Access Type** – Odaberite tip liste (privatna ili javna)

Kliknite na dugme **Add**.

Mailing Lists

Use a single address to send email to multiple email addresses. For more information, read the [documentation](#).

Brisanje mailing liste

Kada je mailing lista kreirana, ona će se pojaviti u listi ispod gde možete da promenite lozinku, obrišete je, ili da upravljate sa njom (dodavanje email adresa, itd.) Klikom na dugme **Delete** lista se briše.
